

Washington Flora Checklist

A checklist of the Vascular Plants of Washington State

Hosted by the University of Washington Herbarium

Family: Zygomycetaceae

2 terminal taxa (species, subspecies, and varieties).

The Washington Flora Checklist aims to be a complete list of the native and naturalized vascular plants of Washington State, with current classifications, nomenclature and synonymy.

Taxa included in the checklist:

- * Native taxa whether extant, extirpated, or extinct.
- * Exotic taxa that are naturalized, escaped from cultivation, or persisting wild.
- * Waifs (e.g., ballast plants, escaped crop plants) and other scarcely collected exotics.
- * Interspecific hybrids that are frequent or self-maintaining.
- * Some unnamed taxa in the process of being described.

Family classifications follow [APG IV](#) for angiosperms, PPG I (J. Syst. Evol. 54:563-603. 2016.) for pteridophytes, and Christenhusz et al. (Phytotaxa 19:55-70. 2011.) for gymnosperms, with a few exceptions. Nomenclature and synonymy at the rank of genus and below follows the [2nd Edition of the Flora of the Pacific Northwest](#) except where superseded by new information.

Accepted names are indicated with blue font; synonyms with black font.
Native species and infraspecies are marked with **boldface** font.

Please note: This is a working checklist, continuously updated. Use it at your discretion.

Created from the Washington Flora Checklist Database on April 23rd, 2024 at 9:07pm PST.

Dicots:

Zygophyllaceae [HC, HC2] Creosote-Bush Family

Synonyms: (none)

References: (none)

Tribulus [HC, HC2]

ground bur-nut, land caltrop, puncture-vine

Tribulus terrestris L. [HC, HC2]

Sp. Pl. 1: 387,
puncture vine

Noxious weed.

Zygophyllum [HC, HC2]

bean-caper

Zygophyllum fabago L. [HC, HC2]

Sp. Pl. 1: 385.
Syrian bean-caper

Noxious weed.
