

Washington Flora Checklist

A checklist of the Vascular Plants of Washington State

Hosted by the University of Washington Herbarium

Family: Araceae

12 terminal taxa (species, subspecies, and varieties).

The Washington Flora Checklist aims to be a complete list of the native and naturalized vascular plants of Washington State, with current classifications, nomenclature and synonymy.

Taxa included in the checklist:

- * Native taxa whether extant, extirpated, or extinct.
- * Exotic taxa that are naturalized, escaped from cultivation, or persisting wild.
- * Waifs (e.g., ballast plants, escaped crop plants) and other scarcely collected exotics.
- * Interspecific hybrids that are frequent or self-maintaining.
- * Some unnamed taxa in the process of being described.

Family classifications follow [APG IV](#) for angiosperms, PPG I (J. Syst. Evol. 54:563?603. 2016.) for pteridophytes, and Christenhusz et al. (Phytotaxa 19:55?70. 2011.) for gymnosperms, with a few exceptions. Nomenclature and synonymy at the rank of genus and below follows the [2nd Edition of the Flora of the Pacific Northwest](#) except where superseded by new information.

Accepted names are indicated with blue font; synonyms with black font.
Native species and infraspecies are marked with **boldface** font.

Please note: This is a working checklist, continuously updated. Use it at your discretion.

Lemna minor L. [FNA22, HC, HC2]

Sp. Pl. 2: 970.

common duckweed, lesser duckweed, water lentil

This species has often been misidentified. Many specimens previously identified as *L. minor* are in fact *L. turionifera*, which apparently is far more common in Washington than *L. minor*.

Lemna minuta Kunth [FNA22, HC2]

Nov. Gen. Sp. 1: 372.

least duckweed

Lemna minima Phil. [Abrams], invalid name

Lemna minuscula Herter [JPM]

Lemna trisulca L. [FNA22, HC, HC2]

Sp. Pl. 2: 970.

ivy duckweed, ivy-leaved duckweed, star duckweed

Lemna turionifera Landolt [FNA22, HC2]

Aquatic Botany. 1: 355, fig. 4g?h.
